PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building web applications using Java, JDBC, JSP, Servlets, MySQL, HTML, CSS, and JavaScript. Experienced in developing end-to-end features including authentication, database integration, cart and order workflows, and responsive user interfaces. Secured 2nd position among 50+ teams at GDG Innohacks 2K25 and completed a 6-month full-stack development internship. Strong foundation in Java and full-stack development with a focus on building practical, scalable applications.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript
Frontend: HTML, CSS
Backend: Java, JDBC, JEE, JSP, Servlets, Spring, Hibernate
Database: MySQL
Tools: Git, GitHub, VS Code, Postman, Apache Tomcat

EXPERIENCE

Full Stack Developer Intern (MERN Stack)

- Completed a 6-month internship building responsive, production-style web applications across the full stack.
- Developed and integrated REST APIs connecting React frontends to backend services, supporting real-time data updates.
- Managed relational data design and queries in MySQL, improving data retrieval and application scalability.

Technologies: *HTML, CSS, JavaScript, Bootstrap, Core Java, MySQL*

PROJECTS

Foodify – Full-Stack Food Ordering System

- Developed a full-stack food ordering application enabling user authentication, restaurant search, menu browsing, favorites, cart management, checkout, order placement, and order history tracking.
- Implemented JSP/Servlet-based request handling with JDBC database operations and DAO architecture, ensuring robust session management, dynamic quantity updates, and accurate billing.
- Designed responsive, user-friendly interfaces for restaurant discovery, cart, checkout, favorites, and order management to deliver a seamless ordering experience.

Technologies: *Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, JavaScript, Apache Tomcat, Git/GitHub*

Full-Stack Job Portal Application

- Built a responsive job search platform with filtering functionality using HTML5, CSS3, and Bootstrap.
- Implemented backend logic and connected it to a MySQL database to support real-time job listing and search updates.
- Collaborated in a 3-developer team to deliver user authentication, REST APIs, and job search features under a fixed deadline, placing 2nd out of 50+ teams at GDG Innohacks 2K25.

Technologies: *JavaScript, HTML5, CSS3, Bootstrap, MySQL, GitHub*

False Data Injection Detection in Power Systems — *Final Year Project*

- Engineered a False Data Injection Attack detection framework for smart grids using LASSO regression for feature selection combined with ensemble methods (Random Forest, AdaBoost) and deep learning models (CNN-LSTM, GNN).
- Integrated LIME (Local Interpretable Model-Agnostic Explanations) to surface human-readable explanations of model predictions, improving decision transparency for end users.
- Built and deployed a full-stack Flask web application with user registration, authentication, data upload, real-time prediction, and result visualization, evaluated on a public Kaggle FDIA dataset.

Technologies: *Python, Flask, LASSO Regression, Decision Tree, Random Forest, AdaBoost, CNN-LSTM, GNN, LIME*

ACHIEVEMENTS

- Hackathon Runner-Up – GDG Innohacks 2K25 (March 2025): Secured 2nd position among 50+ competing teams by building and demonstrating a full-stack job portal application with a 3-person team in a time-constrained hackathon.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Sri Venkateswara College of Engineering, Tirupati | 2022 – 2026 | CGPA: 8.41/10

CERTIFICATIONS

- Java Programming – Udemy (April 2024 – January 2025): Object-Oriented Programming, Data Structures, Java Fundamentals
- Frontend Web Development – Udemy (November 2024): HTML5, CSS3, Responsive Design, Layout Techniques
- SQL and Database Management – Udemy (November 2024): SQL Basics, Queries, Joins, Database Fundamentals

KEY STRENGTHS

- Full-stack development expertise, problem solving, team collaboration, and quick learner with continuous growth mindset.
- Ability to implement practical solutions, deliver under time constraints, and master advanced development concepts.
